CYPRUS DIVE SITES

FAMAGUSTA / PROTARAS

- **GREEN BAY**

  GPS Coordinates: .................................................35° 0'1.13"N / 34° 4'4.51"E

  Type of Dive Site: ...............................................Shore dive

  MAX Depth: ..........................................................11m

  Visibility: ............................................................20m plus in good conditions

  Access: .................................................................Very easy access from the shore (walk in)

  Minimum Diving Qualifications: .............................Open Water

  Recreational Diving / Technical Diving: .................Recreational Diving

  Characteristics / Interesting Reference Points:

  - Easiest dive site in the area (walk in entry)
  - Most suitable for introductory dives and beginners
  - Rarely there is a current or waves
  - Divers can see the numerous artificial statues at 10m depth
  - Common practice to feed the fish at less than 5m depth
  - Frequent turtle sighting
  - Hundreds of seabreams around the feeding area
  - Easy access for all type of cars

- **GREEN BAY CAVE**

  GPS Coordinates: .................................................34°59'57.28"N / 34° 4'11.37"E

  Type of Dive Site: ...............................................Rocky bottom, small caverns (through and through)

  MAX Depth: ..........................................................17m

  Visibility: ............................................................20m plus in good conditions

  Access: .................................................................Very easy access from the shore (walk in)

  Minimum Diving Qualifications: .............................Open Water

  Recreational Diving / Technical Diving: .................Recreational Diving

  Characteristics / Interesting Reference Points:

  - Approximately 10m of swimming/diving from entry point
  - Beautiful through and through caverns with corals
  - Excellent spot for scooter diving (DPV)
  - Lionfish in the caverns
CYPRUS DIVE SITES

- Other cave specific marine life
- Turtles and Moray Eels
- Easy access for all type of cars

CYCLOPES CAVES

GPS Coordinates: .................................................34°59'10.24"N / 34° 4'35.99"E
Type of Dive Site: ..............................................Rocky, sandy, drop off (cliff) MAX Depth:
MAX Depth: ....................................................45m
Visibility: .............................................................20m plus in good conditions
Access: ..............................................................Easy access from the entry point (entry depth 1m)
Minimum Diving Qualifications: .........................Open Water
Recreational Diving / Technical Diving: .................Recreational and Technical Diving

Characteristics / Interesting Reference Points:
- One of the most beautiful dive sites of the area
- The cliff hosts numerous marine life including moray eels, sea urchins, star fish, lion fish, nudi branch, grouper fish, seabreams
- Excellent site for both beginners up to technical divers
- Very suitable dive site for skills, including mapping, night diving, navigation and deep dives
- Beautiful view outside the dive site from the so-called Cyclopes caves (a cave above the dive site)
- Easy access for all type of cars

CHAPEL (AGIOI ANARGIROI)

GPS Coordinates: .................................................34°58'33.88"N / 34° 4'33.98"E
Type of Dive Site: ..............................................Rocky, sandy, drop off (cliff)
MAX Depth: ....................................................40m
Visibility: .............................................................20m plus in good conditions
Access: ..............................................................Easy access up to the entry point (steps from the Chapel), but difficult entry and exit point. Entry point 8m depth
Minimum Diving Qualifications: .........................Open Water
Recreational and Technical Diving: .........................Recreational and Technical Diving

Characteristics / Interesting Reference Points:
- One of the most beautiful dive sites of the area with excellent visibility and changing scenery
- Numerous marine life including moray eels, sea urchins, lion fish, nudi branch, grouper fish, seabreams
- Excellent site for both beginners up to technical divers
CYPRUS DIVE SITES

- Very suitable dive site for night diving, navigation and deep dives
- One of the most scenic places in the area, with a beautiful chapel and beautiful sunset view
- Easy access for all type of cars

---

**DA COSTA**

GPS Coordinates: ................................................. 35° 0'24.58"N / 34° 3'44.63"E
Type of Dive Site: .................................................. Shore dive
MAX Depth: ........................................................... 11m
Visibility: ......................................................... 15m plus in good conditions
Access: .............................................................. Very easy access from the shore (walk in)
Minimum Diving Qualifications: ............................. Open Water
Recreational and Technical Diving ........................ Recreational Diving
Characteristics / Interesting Reference Points:
- One of the easiest dive sites in the area (walk in entry)
- Most suitable for introductory dives and beginners
- Rarely there are waves
- Mostly flat sandy surface with rocky spots hosting small marine life
- Easy access for all type of cars
- Frequent turtle sighting

---

**CAVES**

GPS Coordinates: ................................................. 34°57'48.86"N / 34° 4'23.33"E
Type of Dive Site: .................................................. Flat sandy and small through and through caverns
MAX Depth: ........................................................... 12m
Visibility: ......................................................... 20m plus in good conditions
Access: .............................................................. Two entry points: 1 with 1.5m drop off and one with 3m drop off
Minimum Diving Qualifications: ............................. Open Water
Recreational and Technical Diving ........................ Recreational Diving
Characteristics / Interesting Reference Points:
- One of the easiest dive sites in the area
- One of the most interesting sites for new divers due to the caverns
- Multiple swim-throughs and through and through caverns
**CYPRUS DIVE SITES**

- Cavern specific marine life
- Not particularly easy access for saloon cars

---

**THE CANYON**

GPS Coordinates: \(34°57'40.41"N / 34° 3'51.72"E\)

Type of Dive Site: Sandy bottom & drop off (cliff)

Max Depth: \(20m\)

Visibility: \(20m\) plus in good conditions

Access: Not easy access from the shore, rocky entrance, (not suitable for beginners), boat diving suggested

Minimum Diving Qualifications: Open Water (and Boat Diver if access by boat)

Recreational and Technical Diving: Recreational

*Characteristics / Interesting Reference Points:*

- Very beautiful and distinct due to the canyon entry with cliff left and right
- Rocky drop off up to 18m and then sandy surface
- Entry and exit point can be challenging especially if there are waves and currents
- One of the nicest dive sites for more experienced divers
- Not suitable for non 4x4 cars
- Frequent sting ray sightings

---

**GAVO GREGO ANTENNAS DIVE SITE**

GPS Coordinates: \(34°57'44.79"N / 34° 4'49.41"E\)

Type of Dive Site: Rocky bottom with small caverns

Max Depth: \(16ms\)

Visibility: \(20m\) plus in good conditions

Access: Rocky entrance (2-3 meters drop off)

Minimum Diving Qualifications: Open Water

Recreational and Technical Diving: Recreational Diving

*Characteristics / Interesting Reference Points:*

- Easy and interesting dive site
- Very rich in small marine life due to the rocky bottom
- Very good for night diving
- Excellent site for navigation and other skills
CYPRUS DIVE SITES

- Easy access for all cars

➤ **NEMESIS III SHIPWRECK**

GPS Coordinates: .................................35° 3'3.72"N / 34° 2'11.05"E

Type of Dive Site: ...............................Wreck

MAX Depth: ...........................................26m

Visibility: ..............................................20m plus in good conditions

Access: ..................................................Boat only

Minimum Diving Qualifications: ..............Advanced and Boat Diver

Recreational and Technical Diving .............Recreational Diving

Characteristics / Interesting Reference Points:

- Sunk in December 2013 to promote diving in the area
- Nemesis III is 25m long and 6m wide fishing vessel
- Very rich marine life, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms
- Very nice and safe swim throughs for basic wreck diving
- Usually there are good conditions without any strong currents
- It is only 90 meters from the Liberty wreck
- Excellent for scooter diving to visit both the Nemesis and Liberty wrecks

➤ **LIBERTY SHIPWRECK**

GPS Coordinates: .................................35° 2'59.47"N 34° 2'11.76"E

Type of Dive Site: ...............................Wreck

MAX Depth: ...........................................27m

Visibility: ..............................................20m plus in good conditions

Access: ..................................................Boat only

Minimum Diving Qualifications: ..............Advanced and Boat Diver

Recreational and Technical Diving .............Recreational Diving

Characteristics / Interesting Reference Points:

- Sunk in May 2009 to promote diving in the area
- Liberty was a Russian cargo ship (37m long and 10m wide)
- It is only 90 meters from the Nemesis wreck
- Very rich marine life, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms
CYPRUS DIVE SITES

- Very nice and safe swim throughs for basic wreck diving
- Usually there are good conditions without any strong currents
- Excellent for scooter diving to visit both the Nemesis and Liberty wrecks

- OCTAPUS DIVE SITE

GPS Coordinates: 34°59'27.77"N / 34° 4'30.12"E
Type of Dive Site: Rocky
MAX Depth: 15m
Visibility: 20m plus in good conditions
Access: Access from the shore (rocky entrance)
Minimum Diving Qualifications: Open Water
Recreational and Technical Diving: Recreational

Characteristics / Interesting Reference Points:
- One of the most beautiful dive sites of the area
- Rich marine life including moray eels, sea urchins, lion fish, nudi branch, grouper fish, but it is most famous for the numerous octopus
- Excellent site for beginners and advanced divers
- Very suitable dive site for skills, including mapping, night diving, navigation and deep dives
- Easy access for all type of cars

- KYRENIA SHIPWRECK

GPS Coordinates: 34°58'42.37"N / 33°58'52.23"E
Type of Dive Site: Wreck
MAX Depth: 23m
Visibility: 20m plus in good conditions
Access: Boat only
Minimum Diving Qualifications: Advanced and Boat Diver
Recreational and Technical Diving: Recreational Diving

Characteristics / Interesting Reference Points:
- Sunk in March 2015 to promote diving in the area
The Kyrenia wreck was a Greek navy boat originally called HS Knossos (renamed Kyrenia in 2000)

- The marine life is not as rich as in the other wrecks
- Very nice and safe swim throughs for basic wreck diving
- Usually there are good conditions without any strong currents

**LARNAKA AREA**

- **MS ZENOBIA**
  - GPS Coordinates: 34°53'31.80"N/ 33°39'16.20"E
  - Type of Dive Site: Wreck
  - MAX Depth: 42m
  - Visibility: 25m plus visibility
  - Access: Boat only
  - Minimum Diving Qualifications: Advanced and Boat Diver
  - Recreational Diving / Technical Diving: Recreational and Technical Diving
  - Characteristics / Interesting Reference Points:
    - One of the top 10 ship wrecks in the world
    - Zenobia is 172m long and 28m wide
    - The richest marine life in Cyprus, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms, star fish, turtles
    - Can be one of the most pleasant but also most challenging dives due to the depth and occasional currents
    - One of the best sites in the world for wreck and advanced wreck diving
    - Suitable also for scooter diving
    - Multiple dives are required to explore all the aspects and beauties of the wreck
    - MS Zenobia sunk on its side
    - If diving in Cyprus, this is the one place that is not to be missed

- **ELPIDA SHIPWRECK**
  - GPS Coordinates: 34°57'06.3"N/ 33°41'05.6"E
  - Type of Dive Site: Wreck
CYPRUS DIVE SITES

MAX Depth: ...........................................................30m
Visibility: .................................................................Winter: 15 m and Summer from 15-25m
Access: .................................................................Boat only
Minimum Diving Qualifications: .........................AOW / Advanced diver
Recreational Diving / Technical Diving: ......................Recreational and Technical Diving

Characteristics / Interesting Reference Points:
• The wreck is reasonable size for 2 dives in a day. Safe for penetration for certified wreck divers.
• Excellent wreck dives for beginner AOW and for experienced divers.
• Long Bottom time as it starts from 14m and max depth is 30m with good visibility.

 ➢ LEF1

GPS Coordinates:  .................................................34°57'8.23"N / 33°40'8.50"E
Type of Dive Site: ..................................................Wreck & Reef
MAX Depth: ...........................................................13m
Visibility: .................................................................Winter 15m and Summer 15-25m
Access: .................................................................Boat
Minimum Diving Qualifications: ..........................Open water divers
Recreational Diving / Technical Diving: ....................Recreational Diving

Characteristics / Interesting Reference Points:
• Reef stretching parallel with the shore / Many species of Marine life that is exclusive on this reef!
• Perfect for underwater photography and fish identification specialty courses.
• The small wreck LEF1 decorate the reef and small groupers use it as shelter.

 ➢ HMS CRICKETWRECK

GPS Coordinates: .................................................................34°58'5.40"N / 33°48'4.02"E
Type of Dive Site: ..................................................Wreck
MAX Depth: ...........................................................32m
Visibility: .................................................................20m plus visibility
Access: .................................................................Boat only
CYPRUS DIVE SITES

Minimum Diving Qualifications: .........................Advanced and Boat Diver
Recreational Diving / Technical Diving: .................Recreational and Technical Diving

Characteristics / Interesting Reference Points:

- The ship was used as target practice by the British military
- Eventually, the ship sunk in 1947 off the coast of Larnaca
- HMS cricket is 72m long and 11m wide
- One can see groupers, lion fish, seabreams, sea slugs, moray eels, tube warms, star fish
- One of the nicest wreck dive sites in Cyprus
- The wreck is upside down
- There some swim through options for wreck diving

➢ ALEXANDRIA SHIPWRECK

GPS Coordinates: .................................................N34°53.49 / E33°39.27
Type of Dive Site: ..................................................Wreck
MAX Depth: ...........................................................30m
Visibility: .................................................................20m plus visibility
Access: .................................................................Boat only

Minimum Diving Qualifications: .........................Advanced and Boat Diver
Recreational Diving / Technical Diving: .................Recreational and Technical Diving

Characteristics / Interesting Reference Points:

- One of the very few wooden ship wrecks
- Alexandria used to be a fishing boat and sat perfectly when sunk in 2006
- Alexandria is 30m long and 9m wide
- Beautiful marine life with significant number of various kinds of school of fish
- One of the nicest wreck dive sites in Cyprus
- Very small swim through
- It is convenient for technical diving due to its depth, but for not advanced wreck diving
PYLA PIRATE CAVES (Xylofagou)

GPS Coordinates: 34°56'38.83"N / 33° 51'16.57"E
Type of Dive Site: Caves and caverns
MAX Depth: 5m
Visibility: 20m plus in good conditions
Access: Boat access only
Minimum Diving Qualifications: Open Water and boat diver
Recreational Diving / Technical Diving: Recreational Diving

Characteristics / Interesting Reference Points:
- It is good for experienced open water divers
- One of the most interesting sites for new divers due to the caverns and caves
- This is the only place in Cyprus where you can dive in a cave and surface inside a mountain where you can see stalactites
- The marine life in the area is not particularly rich, but the experience of the cave is certainly worth it

CAPE PYLA REEF (Xylofagou)

GPS Coordinates: 34°56'23.67"N / 33°51'16.22"E
Type of Dive Site: Reef with small canyons
MAX Depth: 18m
Visibility: 20m plus in good conditions
Access: Boat access only
Minimum Diving Qualifications: Open Water and boat diver
Recreational Diving / Technical Diving: Recreational Diving

Characteristics / Interesting Reference Points:
- It is good for experienced open water divers
- Rich marine life
- The canyons are particularly interesting as they ascend from the bottom, making the swim through very interesting
CYPRUS DIVE SITES

- **BULLET POINT (Xylofagou)**
  - GPS Coordinates: 34°57'38.79"N / 33°49'47.84"E
  - Type of Dive Site: Rocky and small canyons
  - MAX Depth: 16m
  - Visibility: 20m plus in good conditions
  - Access: Shore access
  - Minimum Diving Qualifications: Open Water
  - Recreational Diving / Technical Diving: Recreational Diving
  - Characteristics / Interesting Reference Points:
    - One of the nicest and easiest dive sites
    - Almost always there are good conditions
    - Very nice marine life with sea slugs, star fish, moray eels
    - It is located off a shooting range, and for this reason divers will frequently see bullets at the bottom of the sea

- **NAIL (Xylofagou)**
  - GPS Coordinates: 34°57'27.16"N / 33°50'9.03"E
  - Type of Dive Site: Rocky and small caverns
  - MAX Depth: 17m
  - Visibility: 20m plus in good conditions
  - Access: Shore access
  - Minimum Diving Qualifications: Open Water
  - Recreational Diving / Technical Diving: Recreational Diving
  - Characteristics / Interesting Reference Points:
    - Very similar and very close to the Bullet Point dive site
    - Almost always there are good conditions
    - Very nice marine life with sea slugs, star fish, moray eels
CYPRUS DIVE SITES

LIMASSOL AREA

- COSTANDIS SHIPWRECK
  GPS Coordinates: ................................................. 34°40'46.63"N / 33° 5'6.67"E
  Type of Dive Site: .................................................. Wreck
  MAX Depth: ........................................................... 24m
  Visibility: ................................................................. 20m plus in good conditions
  Access: ................................................................. Boat only
  Minimum Diving Qualifications: ......................... Open Water and Boat Diver
  Recreational Diving / Technical Diving: ................. Recreational Diving

  Characteristics / Interesting Reference Points:
  - Costandis is one of the two ships sunk to promote diving in the area (along with Lady Thetis)
  - The boat was a USSR Trawler built in 1989 and was sunk February 2014
  - Rich marine life, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms
  - Usually there are currents, but it is still very safe
  - It is located 200m from Lady Thetis
  - It is excellent for scooter diving

- LADY THETIS SHIPWRECK
  GPS Coordinates: ................................................. 34°40'55.78"N / 33° 5'1.99"E
  Type of Dive Site: .................................................. Wreck
  MAX Depth: ........................................................... 19m
  Visibility: ................................................................. 20m plus in good conditions
  Access: ................................................................. Boat only
  Minimum Diving Qualifications: ......................... Open Water and Boat Diver
  Recreational Diving / Technical Diving: ................. Recreational Diving

  Characteristics / Interesting Reference Points:
  - Lady Thetis is one of the two ships sunk to promote diving in the area (along with Costandis)
  - The boat was a passenger vessel and was sunk in February 2014
  - Rich diverse marine life, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms
CYPRUS DIVE SITES

• Usually there are currents, but it is still very safe
• It is located 200m from Costandis
• It is excellent for scooter diving

➢ THE STRUCTURES
GPS Coordinates: .............................34°40’50.34"N / 33° 5’4.74"E
Type of Dive Site: .....................................Artificial Reef
MAX Depth: .................................................22m
Visibility: .................................................15m plus in good conditions
Access: .....................................................Boat access only
Minimum Diving Qualifications: ....................Open Water and Boat Diver
Recreational Diving / Technical Diving: ..............Recreational Diving

Characteristics / Interesting Reference Points:
• This is a very recent artificial reef that was created in 2016/2017
• Rich marine life, with groupers, lion fish, seabreams, sea slugs, moray eels, tube warms
• Usually there are currents, but it is still very safe
• Frequent turtle sighting

➢ JUBILEE SHOALS
GPS Coordinates: .............................34°37’46.44"N / 32°46’12.78"E
Type of Dive Site: .....................................Rocky / Drop off mountain wall / cave
MAX Depth: .................................................65m
Visibility: .................................................20m plus in good conditions
Access: .....................................................Boat access only
Minimum Diving Qualifications: ....................Advanced
Recreational Diving / Technical Diving: ..............Recreational and Technical

Characteristics / Interesting Reference Points:
• Characterized by the mountain wall on one side
• Very rich marine life, including shoals of amberjack, crayfish and colored wrasse
CYPRUS DIVE SITES

- Multiple caves at various depths
- Excellent for technical diving
- Many areas to discover and it is worth visiting more than once to explore the area

PAPHOS AREA

- **AMPHITHEATRE**
  - GPS Coordinates: .................................................34°51.351N/32°20.744E
  - Type of Dive Site: ..................................................Rocky and sandy bottom
  - MAX Depth: ...........................................................21m
  - Visibility: .................................................................20 m plus in good conditions
  - Access: .................................................................Easy access from the shore
  - Minimum Diving Qualifications: .........................Open Water
  - Recreational Diving / Technical Diving: ................Recreational Diving
  - Characteristics / Interesting Reference Points:
    - The rocks take the shape of an amphitheater
    - Most suitable for beginners
    - Mostly flat sandy surface with rocky spots
    - Regular Cyprus marine life

- **ACHILLEAS SHIPWRECK**
  - GPS Coordinates: .................................................34°46'24.42"N / 32°23'28.20"E
  - Type of Dive Site: ..................................................Wreck
  - MAX Depth: ...........................................................11m
  - Visibility: .................................................................20 Meters plus in good conditions
  - Access: .................................................................Boat only
  - Minimum Diving Qualifications: .........................Open Water and Boat Diver
  - Recreational Diving / Technical Diving: .................Recreational Diving
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:

• The wreck lies on a sandy bottom
• It was a Greek boat built in 1949 that exploded and sunk in 1975
• It is 53m long
• Very basic Cyprus marine life surrounds the wreck

➢ VERA K SHIPWRECK

GPS Coordinates: .................................................34°43'17.28"N / 32°25'42.18"E

Type of Dive Site: .................................................. wreck

MAX Depth: ...........................................................11m

Visibility: .................................................................20 m plus in good conditions

Access: ................................................................. Boat only

Minimum Diving Qualifications: .........................Open Water and Boat Diver

Recreational Diving / Technical Diving: ...............Recreational Diving

Characteristics / Interesting Reference Points:

• The ship was a Lebanese freighter
• The ship ran aground in 1972 in shallow waters, and for safety purposes it was sunk in 1974
• The wreck is almost fully destroyed with the exception of some archways suitable for swim throughs
• There are occasionally strong currents, but it is still a very safe dive
• Basic Cyprus marine life

➢ AMPHORA CAVE

GPS Coordinates: .................................................34°43'21.36"N / 32°26'14.76"E

Type of Dive Site: .................................................. Rocky and sandy bottom

MAX Depth: ...........................................................12m

Visibility: .................................................................20 Meters plus in good conditions

Access: ................................................................. Boat only

Minimum Diving Qualifications: .........................Open Water and Boat Diver

Recreational Diving / Technical Diving: ...............Recreational Diving
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:
- Most suitable for beginners
- Mostly flat sandy surface with rocky spots
- Regular Cyprus marine life
- It is characterized by the small cave where one can see a small amphora

PISTOL CAVE
GPS Coordinates: ................................................. 34°53′1.56″N / 32°19′51.64″E
Type of Dive Site: .................................................. Rocky and sandy bottom
MAX Depth: ........................................................... 12m
Visibility: ................................................................. 20m plus in good conditions
Access: ................................................................. Easy access from the shore
Minimum Diving Qualifications: ............................. Open Water
Recreational Diving / Technical Diving: ................. Recreational Diving
Characteristics / Interesting Reference Points:
- Small caverns and caves
- Suitable for beginners and more experienced divers
- Mostly flat sandy surface with rocky spots
- Regular Cyprus marine life

WHITE STAR SHIPWRECK
GPS Coordinates: .................................................. 34°43′56.76″N / 32°24′51.96″E
Type of Dive Site: .................................................. wreck
MAX Depth: ........................................................... 18m
Visibility: ................................................................. 20m plus in good conditions
Access: ................................................................. Boat only
Minimum Diving Qualifications: ......................... Open Water and Boat Diver
Recreational Diving / Technical Diving: ................. Recreational Diving
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:
- The wreck lies on a sandy bottom
- It was a Russian fishing boat that sunk in 2007
- One will see mostly groupers and sea breams
- Occasional currents, but still safe to dive

➢ ROMAN WALL (STRUCTURES)
GPS Coordinates: .................................................34°45'18.34"N / 32°24'55.80"E
Type of Dive Site: ..................................................Artificial Reef
MAX Depth: ...........................................................4m
Visibility: ............................................................10m plus in good conditions
Access: ...............................................................Easy access from the shore
Minimum Diving Qualifications: ................................Open Water
Recreational Diving / Technical Diving: ................Recreational Diving
Characteristics / Interesting Reference Points:
- This is the newest artificial reef that was created in October 2019
- Suitable for beginners
- Very basic Cyprus marine life

LATCHI AKAMAS AREA

➢ ST. GEORGIOS ISLAND
GPS Coordinates: .................................................35° 4'29.16"N / 32°20'0.79"E
Type of Dive Site: ..................................................Island drop off & Caves
MAX Depth: ...........................................................55m
Visibility: ............................................................30m plus in good conditions
Access: ...............................................................Boat access only
Minimum Diving Qualifications: ..............................Open water and boat Diver
Recreational Diving / Technical Diving: ................Recreational and Technical
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:

- Characterized by the mountain wall on one side
- Very rich marine life, including shoals of amberjack, crayfish and colored wrasse, groupers, star fish, sting rays, moray eels, etc.
- A small shallow cave
- Excellent for technical diving
- Many areas to discover and it is worth visiting more than once to explore the area

ST. GEORGIOS REEF

GPS Coordinates: 35° 4'13.47"N / 32°19'49.38"E
Type of Dive Site: Rocky bottom
MAX Depth: 10m
Visibility: 30m plus in good conditions
Access: Boat access only
Minimum Diving Qualifications: Open water and boat Diver
Recreational Diving / Technical Diving: Recreational Diving

Characteristics / Interesting Reference Points:

- It is located opposite the St. Georgios island
- Very rich marine life, including shoals of amberjack, crayfish and colored wrasse, groupers, star fish, sting rays, moray eels, etc.
- Easy dive and great opportunity to explore the richness of the Cypriot marine life

PHOTIADES WALL

GPS Coordinates: 35° 4'39.10"N / 32°19'0.26"E
Type of Dive Site: Rocky bottom / Reef / Drop off
MAX Depth: 25m
Visibility: 20m plus in good conditions
Access: Shore access
Minimum Diving Qualifications: Open water
Recreational Diving / Technical Diving: Recreational Diving
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:
- It is characterized by the long wall drop off
- If you are lucky and you catch a current, you may experience a nice and safe drift dive along the wall.
- Easy dive and great opportunity to explore the richness of the Cypriot marine life
- Very rich marine life, including shoals of amberjack, crayfish and colored wrasse, groupers, star fish, sting rays, moray eels, etc.

Ʌ  BLUE LAGOON

GPS Coordinates: .................................................35° 4'57.83"N / 32°18'26.90"E
Type of Dive Site: .................................................. Sandy Bottom
MAX Depth: ........................................................... 10m
Visibility: ................................................................. 20m plus in good conditions
Access: ................................................................. Shore access or Boat
Minimum Diving Qualifications: ............................. Open water / boat diver
Recreational Diving / Technical Diving: ................. Recreational Diving

Characteristics / Interesting Reference Points:
- Excellent for beginners
- Crystal clear water with sandy bottom
- Not particularly rich marine life
- Very pleasant and relaxing dive site

Ʌ  FONTANA AMOROSA

GPS Coordinates: .................................................35° 5'21.06"N / 32°18'7.26"E
Type of Dive Site: .................................................. Sandy and Rocky Bottom
MAX Depth: ........................................................... 15m
Visibility: ................................................................. 20m plus in good conditions
Access: ................................................................. Shore access or Boat
Minimum Diving Qualifications: ............................. Open water / boat diver
Recreational Diving / Technical Diving: ................. Recreational Diving
CYPRUS DIVE SITES

Characteristics / Interesting Reference Points:

- Excellent for beginners
- Crystal clear water with sandy and rocky bottom
- Some marine life at the rocky spots
- Very pleasant and relaxing dive site

AMPHITHEATRE BAY

GPS Coordinates: 35° 4'33.04"N / 32°19'2.09"E
Type of Dive Site: Sandy and Rocky Bottom
MAX Depth: 18m
Visibility: 20m plus in good conditions
Access: Shore access or Boat
Minimum Diving Qualifications: Open water / boat diver
Recreational Diving / Technical Diving: Recreational Diving

Characteristics / Interesting Reference Points:

- Excellent for beginners
- The main characteristic is the location of the rocks, which form an underwater amphitheater
- Crystal clear water with sandy and rocky bottom
- Some marine life at the rocky spots
- Very pleasant and relaxing dive site
